Service

History
Cheyenne Regional Medical Center traces its history back to 1867 when it began as a frontier tent hospital constructed by the Union Pacific Railroad to treat workers injured building the transcontinental railroad. Through the years, we’ve grown and changed to meet the needs of the people we serve in southeastern Wyoming and western Nebraska. The one thing that has not changed is our original pioneering spirit, which continually pushes us to seek out how we can best care for and meet the health needs of our community and region. This pioneering spirit is also what prompted us to enter into a management services agreement with UCHealth in 2018, with the goal of offering world-class care, close to home.

Community Benefit
To help ensure that more Laramie County residents have access to essential health and wellness services, Cheyenne Regional offers hospital-based programs and also partners with organizations that provide a vital safety net to individuals and families in need. The areas where we provide community support are broken down into several categories, including:
• Community health improvement services
• Health professions education
• Subsidized health services
• Community partner grants/in-kind services
• Community-building activities
• Community benefit operations
• Financial assistance at cost
• Government-sponsored healthcare
• Unpaid cost of Medicare
• Bad debt (at cost)

These outreach services totaled more than $245 million from 2012 through 2016.

In 2016 our overall contributions to our community came to more than $42 million. Of that $42 million, the total “community benefit,” which includes the first eight categories above, was more than $17 million.

**Cheyenne Regional Medical Group**

Cheyenne Regional Medical Group (CRMG) is the largest physician/provider group in the state with 75+ providers. CRMG has a governance and operational structure that is provider-driven. Consisting of 17 specialties and a full-time executive staff, CRMG is integrated with Cheyenne Regional’s service lines, including cardiology/vascular/cardiothoracic surgery, hematology-oncology, orthopedics, neurology, pulmonology, endocrinology/diabetes, nephrology, rheumatology, infectious disease, neurosurgery, pain management, internal medicine and primary care.

**Hospitalists**

Cheyenne Regional Medical Center has a strong, growing hospitalist program. Our hospital employs an exceptional roster of highly skilled, specialized physicians to treat a variety of patients and diagnoses 24 hours a day, seven days a week. This program benefits and promotes the overall goal of providing our patients with collaborative, seamless care.

**Wyoming Institute of Population Health**

The Wyoming Institute of Population Health is a division of Cheyenne Regional. Its purpose is to help Wyoming communities and their healthcare providers develop a more proactive approach to patient care and population health management. This is done by reaching out to the residents of communities across Wyoming, beyond the traditional four walls of a hospital or a clinic, to address the challenges of caring for frail or vulnerable populations and rising chronic disease rates, and to deliver evidence-based preventive health services.

We inspire great health!
2018 Awards/Achievements

- Healthgrades, a national health system quality ratings organization:
  - Ranked CRMC as being among the top 10% in the nation for overall pulmonary services (2017-2018)
  - Presented CRMC with the Pulmonary Care Excellence Award (2017-2018)

- CRMC's Cardiovascular service line was jointly recognized by the American College of Cardiology and U.S. News & World Report for superior cardiac care in the magazine's 2018 edition of Best Hospitals.

- Cheyenne Regional Medical Group achieved a perfect 100 score during the first year (2017) of the federal government's Merit-based Incentive Payment System under which they were graded on ambulatory quality, use of the electronic health record and improvement activities.

- Cheyenne Cardiology Associates and staff were recognized by the federal Centers for Medicare & Medicaid Services for sharing with peers nationwide, a Million Hearts Model promising-practice webinar titled "The Heart of the Matter: Maximizing your High-Risk Patient Interactions."

- CRMC is the first hospital in Wyoming to implant a CardioMems™ HF device, a miniscule pulmonary artery pressure sensor that can be used to treat a select group of heart failure patients. The device identifies shifts in a patient’s fluid status real time, leading to quicker treatment of symptoms, improved quality of life and fewer hospital readmissions.

2017 Awards/Achievements

- Healthgrades, a national health system quality ratings organization:
  - Ranked CRMC as being among the top 10% in the nation for cardiology services (2015-2017)
  - Ranked CRMC as being among the top 10% in the nation for coronary interventional procedures (2016-2017)
  - Ranked CRMC for being in the top 10% in the nation for overall pulmonary services (2017)
  - Presented CRMC with the Coronary Intervention Excellence Award (2016-2017)
  - Presented CRMC with the Pulmonary Care Excellence Award (2017)

- CRMC's Behavioral Health Inpatient Unit was recognized by the federal Centers for Medicare & Medicaid Services as being one of the top 20 inpatient psychiatric units in the nation based on standard quality measures of psychiatric care. This placed our unit among the top one percent of inpatient psychiatric units in the nation.

- CRMC received the Platinum Award for Heart Care from the American College of Cardiology. This achievement means that CRMC is one of the nation's top-performing hospitals for the treatment of heart attack patients.

- CRMC received the “Get with the Guidelines”- Stroke Silver Award from the American Heart Association and the American Stroke Association. The goal of “Get with the Guidelines” is to speed recovery and reduce death and disability for stroke patients.

- Mountain-Pacific Quality Health presented our Transitional Care Unit with the “Recognition of Quality Award” for outstanding performance in effectively using quality assurance performance improvement technologies to improve care practices and for the unit’s strong leadership that supports quality care.

- Kindred Hospital Rehabilitation Services presented Cheyenne Regional Medical Center’s Acute Rehabilitation Unit with an award for clinical excellence.

- Cheyenne Regional Medical Group’s five primary care clinics were awarded NCQA (National Committee of Quality Assurance) recognition: Cheyenne Plaza Primary Care, CRMG Family First, Cheyenne Family Medicine and the two Cheyenne Children’s Clinics.

- Cheyenne Women’s Imaging Pavilion (CWIP), a joint venture between CRMC and Cheyenne Radiology Group, achieved the American College of Radiology Breast Imaging Center of Excellence designation. CWIP is the first and only breast imaging center to achieve this designation in Wyoming.

- CRMC was designated as a “Most Wired” hospital for the fourth consecutive year in recognition of its level of Information Technology and Electronic Health Record adoption, sophistication and security. CRMC is one of four stand-alone hospitals in Wyoming and one of 461 hospitals or health systems in the nation to receive the award for 2017.

- Epic Honor Roll: CRMC received a $165,000 cash award from the national software firm Epic for being named to Epic’s honor roll. To achieve this recognition, CRMC’s Epic and Information Technology teams had to demonstrate the hospital’s electronic health record was functioning at a high level in 31 areas related to ease of use, security, integrity and infrastructure. CRMC was the fourth hospital to earn this designation.
