## How many times can I receive a benefit payment?

Each benefit payable will be no more than 100% of the Critical Illness benefit amount. The maximum amount payable during the insured person's lifetime is called the total maximum benefit. You may be eligible to receive benefit payments for multiple conditions, up to the total maximum benefit amount. Each diagnosis must be a different diagnosis. The total maximum benefit amount equals two times the Critical Illness benefit amount for each covered condition. Once the total maximum benefit for a covered condition has been paid, no further benefits are payable for that same covered condition.

Please refer to your certificate of insurance and riders for more information.

## What do you mean by different diagnosis?

To be eligible for a benefit payment, the diagnosis must be a "different diagnosis" than any previously diagnosed illness or condition. This can mean any of the following:

- An insured person has a diagnosis of a covered critical illness that is **different from a previously diagnosed illness or condition**. A cancer that has spread to a different area of the body is not a different illness/condition than the previously diagnosed cancer.
- An insured person receives a **subsequent diagnosis of a covered critical illness that is for the same illness or condition\* as a critical illness for which benefits were payable under the critical illness insurance policy**. The subsequent diagnosis must occur more than 12 months after the date of the previous diagnosis.
- An insured person receives a **subsequent diagnosis of a covered critical illness that is for the same illness or condition\* as an illness/condition previously diagnosed prior to his/her coverage effective date under the critical illness insurance policy**. The subsequent diagnosis must occur more than 12 months after the date of the previous diagnosis.

\*Including a cancer that has spread to a different area of the body
