

# THE RIGHT CARE FOR KIDS, RIGHT HERE

"Back in 1984, my colleagues and I were delivering care in parts of Wyoming where it didn't exist. Looking forward, this partnership brings our collective knowledge and wisdom together to advance education, research and clinical outcomes, and creates unique opportunities for health care delivery, scholarship and philanthropy."

- MICHAEL SCHAFER, M.D.  
*Cardiologist, Children's  
Hospital Colorado*

"Children's Hospital Colorado exemplifies the highest level of care for children available in our region. Our hope is to formalize and fine-tune an alliance that has already been in place a number of years. An expanded array of pediatric specialty clinics, as well as enhanced support for neonatal care and chronic disease management, will help us better serve the children and families of Wyoming."

- ANDREW ROSE, M.D.  
*Pediatrician,  
Cheyenne Regional  
Medical Center*

## The best care in Wyoming partners with the best pediatric care in the West.

Cheyenne Regional Medical Center and Children's Hospital Colorado are committed to improving the health of children in innovative ways. That's why we've created a Care Alliance that provides kids of all ages and families in southeastern Wyoming with the high-quality pediatric care they need, when they need it, close to home.

Cheyenne Regional and Cheyenne Children's Clinic work together to support patient-focused medical homes, ensuring that patients benefit from coordinated models of care and expertise in their own community.

When a higher level of care is needed, Children's Colorado and University of Colorado School of Medicine physicians provide pediatric specialty care in endocrinology, cardiology, hematology, oncology, physical rehabilitation medicine, and more in Cheyenne. The Care Alliance streamlines care by utilizing virtual visits, electronic health record connectivity, and mutually developed protocols, so providers can be confident that their patients are getting the best care.

Our experts are ready to partner with you to keep children healthy, safe and well.
